

# Summer Release Preview

HERE'S A SNEAK PEAK OF  
A FEW OF OUR FAVORITE  
FEATURE UPDATES COMING  
SUMMER 2017 TO E\*VALUE:

- + TERM TRANSLATION UPDATES
- + BIOGRAPHIC DATA IMPORT
- + MANDATORY QUESTION TRIGGERS
- + EDUCATOR SCORECARD UPDATES
- + ICAL INTEGRATION

2017

a medhub product

## TERM TRANSLATION UPDATES

*Apply term translation from your parent programs to your affiliated child programs.*

Term translation allows programs to customize key words to match the terminology their specific healthcare disciplines or programs use. With this enhancement, these same terms can now be translated in the parent program and applied to the child program without additional administrative burden.

## BIOGRAPHIC DATA IMPORT TOOL

*Mass update users' biographic information to streamline workflows.*

The biographic data import tool allows E\*Value program administrators to mass update biographic data within E\*Value. Previously administrators had to reach out to client services to enable mass updates. By empowering administrators, this tool will limit turnaround time and increase system usability by removing inefficient workflows.

Create & Manage Mandatory Question Triggers

Selected Trigger Question

| Question ID | Topic  | Type  | Delete | Preview |
|-------------|--|-------|--------|---------|
| 2045961     | Accountability & Professional Behavior: Demonstrates accountability & professional behaviors in compliance with clinical facility policy, course policy, university policy, HIPPA regulations, and ethical & professional standards. | Scale |        |         |

Select Trigger Answer

| Question ID | Needs Improvement (1)               | Below Expected Training Level (2)   | At Expected Training Level (3) | Exceeds Expected training Level (4) |
|-------------|-------------------------------------|-------------------------------------|--------------------------------|-------------------------------------|
| 2045961     | <input checked="" type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>       | <input checked="" type="checkbox"/> |

Selected Mandatory Question

| Question ID | Topic                | Type  | Delete | Preview |
|-------------|----------------------|-------|--------|---------|
| 2045967     | Areas of improvement | Essay |        |         |

Apply To

| Course / Evaluation Type   |                                     |
|--|-------------------------------------|
| Clin Ed III Outpatient Hospital/Corporate/Non-Private Practice / Faculty Evaluation of Student | <input type="checkbox"/>            |
| Clin Ed I inpatient / Faculty Evaluation of Student  | <input type="checkbox"/>            |
| Clin Ed I Other / Faculty Evaluation of Student  | <input type="checkbox"/>            |
| Clin Ed I Outpatient Hospital/Corporate/Non-Private Practice / Faculty Evaluation of Student   | <input checked="" type="checkbox"/> |

## MANDATORY QUESTION TRIGGERS

*Implement mandatory question triggers to gain deeper insight into evaluation responses.*

Trigger questions allow programs to unearth specific details on a question response based on an answer, to either take corrective action in the case of a poor outcome or to enable best practices following a positive outcome. This process has been re-architected to provide E\*Value administrators the ability to manage advanced evaluation settings on their own.

## EDUCATOR SCORECARD UPDATES

*Improve experiential learning outcomes with performance driven educator management.*

Educator Scorecards pull data from across E\*Value, comparing individual educators against their peers, providing feedback, and comparing trending performance. New enhancements accurately determine where educators rank and narrow where they land in the continuum of their peers to show educator scoring bias and performance.

## ICAL INTEGRATION

*Allow educators and students to integrate their calendars in a single location for easy management of their scheduled activities.*

iCal lets educators and students keep track of their appointments and events with multiple calendars featuring an at-a-glance view of upcoming activities by day, week or month. This allows individuals to manage and view more than one calendar at a time from within a single unified window to quickly identify schedule conflicts and pockets of free time.
