# myTIPreport

Real-time feedback.
Clear progress.
Confident compliance.

Institutional compliance depends on timely, meaningful feedback—but evaluations are often delayed or incomplete. myTIPreport captures feedback in the moment and translates observed performance into clear, milestone-aligned progress, giving programs confidence that trainee advancement toward independent practice is accurately documented and accreditation-ready.

How it works
A Complement—Not a Replacement

MedHub's myTIPreport is designed to work alongside existing residency management systems like **MedHub** and **New Innovations**. Rather than replacing these systems, myTIPreport enhances RMS functionality by enabling **in-the-moment, point-of-care evaluation capture**—allowing residents to generate an evaluation on their mobile device and hand it directly to faculty for immediate completion. This **eliminates login friction, shortens feedback loops, and captures observations while the encounter is still fresh**, resulting in higher completion rates and clearer, more actionable competency data.

"myTIPreport has been a terrific resource for us... This product has changed our program."

**West Virginia University**

400+ programs

230+ institutions

85+ specialties

Works alongside MedHub and other RMS platforms

More accurate, meaningful feedback

myTIPreport enables faculty to provide real-time, observation-based feedback during clinical encounters—improving accuracy, relevance, and learning impact while reducing friction and improving efficiency.
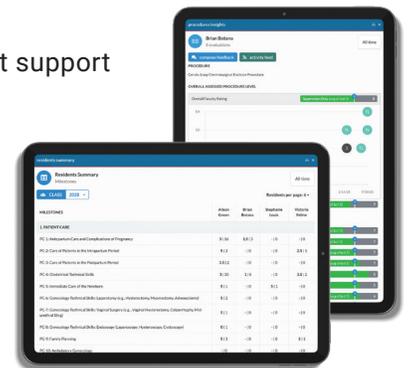

+ Real-time evaluation functionality
+ Short, mobile-friendly evaluations
+ Feedback requests
+ In-app notifications and reminders
+ Resident-device evaluation handoff for on-the-spot faculty feedback

Simplified competency and milestone assessment

Milestones become easier to complete and understand with visual dashboards that support accreditation and institutional compliance with clear, data-backed reporting.

+ Behavior questions mapped to sub-competencies
+ Graduation targets set at the sub-competency level
+ Visual dashboards showing what informs milestone scores
+ Trainee progress dashboards
+ Competency dashboards
+ Insight graphs

Higher faculty engagement

Increase evaluation participation through short, mobile-friendly workflows and built-in motivation designed for busy clinicians.

+ Short, mobile-friendly evaluations
+ Participation competitions
+ Leaderboards and trophies
+ Citizenship tracking
+ Push notifications

Improved efficiency and reduced administrative burden

Streamline evaluation workflows and oversight with centralized visibility and ready-to-use reporting, reducing manual effort while supporting accreditation and institutional compliance.

+ Centralized reporting and visibility
+ Advanced filtering and sorting
+ Accreditation-ready reporting
+ Prebuilt competencies for quick, easy implementation
